

Digital Shadows and Anomali provide a comprehensive solution that aggregates the most sources of threat intelligence to monitor, manage and remediate digital risk. Together, we amplify cyber security and enable you to correlate security incidents and provide richer context on threat actors and their campaigns for better decision making.

Extend Digital Shadows Digital Risk Management with Anomali ThreatStream

Digital Shadows SearchLight™ creates threat indicators based on your phishing incidents, enabling you to block or monitor related activity on your network, and providing insights on threat actors and their campaigns. Anomali ThreatStream integrates with Digital Shadows' rich Threat Intelligence Library and delivers the specific incidents we raise for your organization. You can quickly associate and correlate intelligence across your threat sources, receiving quicker access to threat data and more easily incorporating our intelligence into your research and investigations.

Digital Shadows SearchLight™:

How it Works

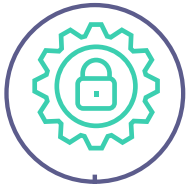

Digital Shadows SearchLight™ offers easy integration with Anomali ThreatStream to pull together rich intelligence on phishing regarding threat actors, their campaigns and specific risks to your organization. We increase the velocity and accuracy of threat detection as part of this integration.

What We Cover

Why Digital Shadows

Ease of Integration

You benefit from the collective threat intelligence of Digital Shadows SearchLight™ by quickly and easily linking to our data. We provide richer intelligence while enabling organizations to gain context on higher priority threats.

Breadth of Sources

The intelligence gathered by Digital Shadows SearchLight™ covers the broadest range of sources across the open, deep, and dark web to provide the most complete picture of your digital risk.

Focus On Meaningful Incidents and Not Just Raw Data

The incidents that are delivered by Digital Shadows SearchLight™ are all human verified, providing additional context about incidents, and ranking based on urgency, vastly reducing false positives. Digital Shadows SearchLight™ integrated with Anomali ThreatStream enables you to focus on what matters most to your organization while simplifying your incident response and SOC management.

About Digital Shadows

Digital Shadows enables organizations to manage digital risk by identifying and eliminating threats to their business and brand. We monitor for digital risk across the broadest range of data sources within the open, deep and dark web to deliver tailored threat intelligence, context and actionable remediation options that enable security teams to be more effective and efficient. Our clients can focus on growing their core business knowing that they are protected if their data is exposed, employees and third parties put them at risk, or their brand is being misused.
