Digital Shadows SearchLight™:

How it Works

The integration between Digital Shadows SearchLight™ and Cisco Umbrella™ is easy to deploy and simple to manage. A robust security defense from Cisco Umbrella™ with digital analytics from SearchLight enables you to stay on top of threats before they reach your network or endpoints.

Integration of Digital Shadows and Cisco Umbrella

Security leaders are concerned about current and emerging threats such as phishing attacks that arise outside the company's perimeter. An organization's business, brand and public reputation can be negatively impacted by phishing attacks. Using integrated data from Digital Shadows SearchLight™ and Cisco Umbrella™ enables you to work smarter and faster while strengthening your defenses.

The Cisco Umbrella™ and SearchLight integration enables you to:

- Uncover current and emerging threats that arise outside your company perimeter
- Stop phishing attacks earlier
- Reduce the risk of brand exposure

The combination of phishing insights from Digital Shadows SearchLight™ and domain intelligence from Cisco Umbrella™ protects enterprises by providing the first line of defense against threat actors.

Why Digital Shadows

Ease of Integration

You benefit from the integration from Digital Shadows SearchLight™ by quickly and easily using our API integration to connect with Cisco Umbrella. Onboarding is straightforward and focused on increasing the effectiveness of your IT and Security team.

Focus on Truly Malicious Threats

Digital Shadows SearchLight™ only sends you the validated phishing threats that you care about in order to use your time most effectively and without being distracted by false positives.

Enable Speedy Remediation

Speed of resolution is important to stop malicious phishing attacks before they impact you and your organization.

About Digital Shadows

Digital Shadows enables organizations to manage digital risk by identifying and eliminating threats to their business and brand. We monitor for digital risk across the broadest range of data sources within the open, deep and dark web to deliver tailored threat intelligence, context and actionable remediation options that enable security teams to be more effective and efficient. Our clients can focus on growing their core business knowing that they are protected if their data is exposed, employees and third parties put them at risk, or their brand is being misused.
